AB - J61239090 Soaping compsn. is composed of vinyl polymer (A) having pyrrolidone skeleton as essential component. The vinyl polymer (A) is a polymer of vinyl pyrrolidone or a copolymer of vinyl pyrrolidone and other vinylic monomer. The (A) is shown by the formula (I) and has mol. wt. of 2000-200,000 pref. 5000-200,000. Other vinylic monomer used includes (meth)acrylic acid, fumaric acid, maleic anhydride, vinyl alcohol, (meth)acrylamide, diacetone acrylamide. Amt. of the soaping compsn. used is 0.2-1.0 g/l.

- USE - The soaping compsn. is used for mfg. brilliantly dyed and fast-dyed goods by removing unfixed dyed and preventing readhered dye. (6pp DWg.No 0/0)

IW - SOAP COMPOSITION DYE CELLULOSE FIBRE GOODS CONTAIN POLYVINYL PYRROLIDONE HOMO CO POLYMER

IKW - SOAP COMPOSITION DYE CELLULOSE FIBRE GOODS CONTAIN POLYVINYL PYRROLIDONE HOMO CO POLYMER
